Global learning: Year 3 focus: Sustainable goal 6

Clean water and sanitation

Although lots of progress has been made in increasing access to clean drinking water and sanitation, there are still billions of people without it.

- One in three people don't have safe drinking water
- 2 out of 5 people don't have access to clean soap and water
- More than 673 million people still have no toilets

What are the sustainable development goals?

The Sustainable Development Goals are a collection of 17 global goals designed to be a "blueprint to achieve a better and more sustainable future for all". The United Nations General Assembly set the SDGs in 2015.

Watch the following video that gives you an introduction and background about the Sustainable development goals.

Design and make your own rain gauge

You can find out how much rain falls in your area by making your own rain measure!
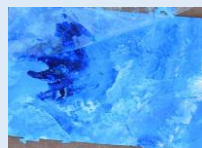

Click here for instructions or scan the QR code

How can you reuse the water you collect, to prevent water wastage?

What can we do to save water usage in the UK?

Create an information leaflet that explains **why we need to save water** and **how we can save water.**

Here are some links to give you more information and ideas:

- How to save water
- Saving our planet

Using watercolour paints, pastels or crayons/pencils, can you create a piece of art depicting the beauty of water?
What colours will you use?
What patterns will you use?
