

Global Learning: Year 6 focus- Sustainable Goal 13

Climate Action

What are the sustainable development goals?

The Sustainable Development Goals are a collection of 17 global goals designed to be a "blueprint to achieve a better and more sustainable future for all". The United Nations General Assembly set the SDGs in 2015.

Watch the following [video](#) that gives you an introduction and background about the Sustainable development goals.

Key questions

- What do I know about climate change?
- What is the greenhouse effect?
- What action can I take to help the planet?

Use the following link to help you answer the questions.

The [effects](#) of climate change.

Watch this inspiring [video](#) with a community with zero waste! How did they accomplish this? Why did they decide to take action? What were the benefits?

Make a list of the small changes that you can make that will create a bigger impact on the local environment.

Use this [link](#) to research artists who create impact through their artwork.

Can you create a piece of artwork showing the impact of global warming?

True or False?

1. Since 1870, global sea levels have risen by about 8 inches.
2. The 15 most 'warmest years on record', have been recorded since 2000?
3. It is predicted that more than a million species will become extinct due to global warming.

Research:

Follow the [link](#) to explore different areas of global warming. These include carbon emissions, sea ice, sea level and the average global temperature. You can then create a non-chronological report about all the things that you have learnt (remember to add pictures and drawings).

Do not forget to complete the quiz!

We would love to see your work and ideas, so please twitter @ThorntonOwls.

True or false? All three answers are true.
