Maths

Tuesday - Reasoning test

During today's Maths lesson, you will have 35 minutes to complete an Reasoning test.
All the questions are based on what you have been taught so far this year.

Questions and answers

You have **35 minutes** to complete this test.

Follow the instructions for each question.

Work as quickly and as carefully as you can.

If you need to do working out, you can use the space around the question.

Some questions have a method box like this:

Diagram illustrating a method box. It shows a grid of 20 columns and 10 rows of small squares. To the left of the grid is a rounded rectangle containing the text "Show your method". To the right of the grid is a smaller rectangle, representing a space for working out.

For these questions you may get a mark for showing your method.

If you cannot do one of the questions, **go on to the next one**.

You can come back to it later, if you have time.

If you finish before the end, **go back and check your work**.

Use the space provided to complete questions.

- Read each question carefully
- Look at what each question is asking you to do.

1

There are 380 cars in a car park.

120 cars leave.

How many cars are now in the car park?

cars

1 mark

2

Tick the statements that are true.

$$3 \times 4 = 4 + 4 + 4$$

☐

$$3 \times 4 = 4 \times 3$$

☐

$$3 \times 4 = 2 \times 6$$

☐

$$3 \times 4 = 12 \times 2$$

☐

3

Olivia and Charlotte are representing numbers on a grid.

Olivia's number				Charlotte's number			
1,000s	100s	10s	1s	1,000s	100s	10s	1s
							

Who has represented 1,305?

Circle

Olivia

Charlotte

Both of them

1 mark

4

The letters A, B and C represent three numbers.

Write the correct letter next to each number.

6,726

6,920

6,355

1 mark

Round 6,355 to the nearest thousand.

1 mark

5

Kallan makes a number.

Write Kallan's number in words.

1 mark

Kallan wants to partition his number in **different** ways.

Complete the part-whole models to show two ways he could do this.

2 marks

6

Brooke is talking about adding 100

Brooke

When you add 100 to a number
it **only** changes the hundreds
column.

For example $2,570 + 100 = 2,670$

Give an example to show that Brooke is not correct.

1 mark

7

Complete the number track.

0	25	50				150
---	----	----	--	--	--	-----

1 mark

8

Here is a correct calculation.

$$568 + 422 = 990$$

Tick the statements that are true.

$$422 - 990 = 568$$

☐

$$422 + 568 = 990$$

☐

$$422 = 568 - 990$$

☐

$$422 = 990 - 568$$

☐

1 mark

Complete the missing number to make this statement true.

$$568 + \boxed{} = 1,010$$

1 mark

9

Amir has £275

He gives £105 to his mum and £80 to his dad.

He shares the money that is left equally between his 10 friends.

How much money does each friend receive?

Show your method

£

2 marks

10

Complete a multiplication fact that each image represents.

$$\square \times \square = \square$$

1 mark

$$\square \times \square = \square$$

1 mark

Complete the number sentences.

$$\boxed{3} \times \boxed{} = \boxed{18}$$

$$\boxed{3} \times \boxed{} = \boxed{180}$$

$$\boxed{180} \div \boxed{} = \boxed{30}$$

3 marks

11

A shape is drawn on a centimetre squared grid.

Work out the perimeter of the shape.

1 mark

Draw a rectangle with a perimeter of 12 cm on this centimetre squared grid.

1 mark

12

Complete the missing numbers.

$$3 \div \square = \square \times 3$$

1 mark

13

Use <, > or = to make the statements correct.

3 thousands, 4 hundreds and 2 ones 3,420

1,000 less than 9,700 1,000 more than 8,700

3,997 rounded to the nearest 10 4,000

3 marks

14

Here is a number line.

What number is B pointing to?

11/11/2019

1 mark

15

Courtney is using the column method to work out $3,999 + 5,999$

	3	9	9	9
+	5	9	9	9
	9	9	9	8
		1	1	1

Explain a more efficient way that Courtney could have worked out the addition.

1 mark

16

Eggs are packed in boxes of 6 and boxes of 12

The table shows the number of eggs sold in a shop on a Saturday.

Size of box	Sales
Box of 6	12
Box of 12	10

On Sunday, the shop sells 150 fewer eggs than they did on Saturday.

They do not sell any boxes of 12 eggs.

How many boxes of 6 eggs are sold on Sunday?

Diagram illustrating a grid of boxes. A callout box on the left indicates the task: "Show your method". A smaller box at the bottom right is labeled "boxes".

3 marks

Wednesday - 4 digit addition

P4L: Timed Pair Share:
Work out the missing digits.

	Th	H	T	O
	2	?	?	4
+	1	2	7	?
	3	8	3	8

Which column should I always start with?

What do you notice about the **tens** column?

How many **hundreds** should there be altogether?

P4L: Timed Pair Share:
Work out the missing digits.

	Th	H	T	O
	2	5	6	4
+	1	2	7	4
	3	8	3	8

|

Which column should I always start with?

I must start with the **ones** column.

$$\begin{array}{l} 4 + ? = 8 \\ 8 - 4 = 4 \end{array}$$

What do you notice about the **tens** column?

? **tens** + 7 **tens** = 3 **tens**.

? **tens** + 7 **tens** must equal 13 **tens**.

13 tens - 7 tens = 6 tens. .

How many **hundreds** should there be altogether?

8 hundreds - 2 hundreds - 1 hundred =
5 hundreds.

Learning outcomes:

LO: To add two 4 digit numbers with regrouping.

Core Skill - I can add two 4 digit numbers together.

Depth Task - I can solve worded problems using addition.

Greater Depth - I can explain my reasoning to answer a problem.

Apply to demonstrate:

We are going to go through 2 examples together. Explain to your partner which columns will need to show a regrouping.

1. $2657 + 3235 =$

1.	Th	H	T	O	
	2	6	5	7	
+	3	2	3	5	
<hr/>					

2. $4739 + 2425 =$

2.	Th	H	T	O	
	4	7	3	9	
+	2	4	2	5	
<hr/>					

Step one:

Set out my columns.

Step two: Add the **ones**.

Step three: Add the **tens**.

Step four: Add the **hundreds**.

Step five: Add the **thousands**.

Apply to demonstrate:

We are going to go through 2 examples together. Explain to your partner which columns will need to show a regrouping.

1. $2657 + 3235 =$

10 **ones** have been regrouped into 1 **tens**.

2. $4739 + 2425 =$

10 **ones** have been regrouped into 1 **tens** and 10 **hundreds** have been regrouping into 1 **thousand**.

1.	Th	H	T	O	
	2	6	5	7	
+	3	2	3	5	
	5	8	9	2	
2.	Th	H	T	O	
	4	7	3	9	
+	2	4	2	5	
	7	1	6	4	

Step one:

Set out my columns.

Step two: Add the **ones**.

Step three: Add the **tens**.

Step four: Add the **hundreds**.

Step five: Add the **thousands**.

Apply to demonstrate:

A	Th	H	T	O
	2	5	3	8
	+	4	7	4
	4	7	4	5

B	Th	H	T	O
	3	5	2	6
	+	4	0	3
	4	0	3	4

	Th	H	T	O

	+	2	7	9
	2	7	9	3

	Th	H	T	O
	6	4	3	8
	+	2	6	2
	2	6	2	7

Apply to demonstrate:

Depth style question:

A submarine dives 1359 metres below the water before reaching an Octopus. It dives a further 2438 metres to the sea bed. How many metres does it dive altogether?

What steps do I need to complete this question?

Step one:

Step two:

Step three:

Apply to demonstrate:

Depth style question:

A submarine dives 1359 metres below the water before reaching an Octopus. It dives a further 2438 metres to the sea bed. How many metres does it dive altogether?

		Th	H	T	O	
		1	3	5	9	
		+	2	4	3	8
			3	7	9	7

What steps do I need to complete this question?

Step one:
Highlight the key information.

Step two:
Set out the columns.

Step three: Starting in the **ones** column, add the numbers together.

Remember to regroup where needed.

Task:

Core skill

Write the following questions into your maths book.

1. $2437 + 4536 =$

2. $1948 + 2351 =$

3. $2948 + 5932 =$

4. $4079 + 2143 =$

5. $6728 + 1325 =$

6. $5843 + 1472 =$

Depth Task

1. A construction site uses 4671kg of cement on the foundations of some houses. If they use another 2,540kg for the foundations of another house. How many kilograms did they use altogether?

2. What is the sum of three thousand, four hundred and seventy six and four thousand, eight hundred and twenty five?

3. Faizaan runs 4650 metres before taking a break. He then runs another 2570metres. How many metres does he run altogether?

4. Umar is playing a computer game. The table shows the number of p her gets in each round.

Round	1	2	3
Number of points	3,550	2,175	1,895

a) How many points does Umar have at the end of Round 2?

b) He needs 8,000 by the end of Round 3 to win the game.

Does Umar win the game?

1.

2.

3.

4.

a)

b)

Greater Depth

Annie, Mo and Alex are working out the solution to the calculation $6,374 + 2,823$

Annie's strategy

$$6,000 + 2,000 = 8,000$$

$$300 + 800 = 1100$$

$$70 + 20 = 90$$

$$4 + 3 = 7$$

$$8,000 + 1100 + 90 + 7 = 8,207$$

Mo's strategy

Friday

P4L: Timed Pair Share:

What operation could I use to help work out the missing number?

$$4886 = \boxed{} + 3492$$

P4L: Timed Pair Share:

What operation could I use to help work out the missing number?

$$4886 = \boxed{} + 3492$$

To work out the missing number problem I need to use the **inverse** operation.

The **inverse** operation is subtraction.

	T	H	T	O
	4	8	8	6
-	3	4	9	2
<hr/>				
<hr/>				

Learning outcomes:

LO: To subtract numbers with up to four digits with regrouping.

Core Skill - I can subtract two 4 digit numbers with more than one exchange.

Depth Task - I can use my knowledge of addition with regrouping to solve worded problems.

Greater Depth - I can use reasoning to find multiple possibilities.

Present new:

What steps do I need to complete the question?

$$4886 = \boxed{} + 3492$$

		Th	H	T	O
		4	8	8	6
-		3	4	9	2

Step one:
Set out the columns.

Step two:

Step three:

Step four:

Step five:

Remember to regroup where you need to!

Present new:

Step two:
Add the two smaller amounts **together**.

Step three:
Subtract the **total** from the largest number.

Depth style question: 2 step problem.

A simple illustration of a sailboat with a red flag and a blue sail, sailing on blue water.

Step one:
Highlight the key information.

Step two:
Add the two smaller amounts **together**.

Step three:
Subtract the **total** from the largest number.

Task:

Core skill

Write the following questions into your maths book.

1. $4938 - 2354 =$

2. $3295 - 1842 =$

3. $3352 - 1826 =$

4. $6297 - 2819 =$

5. $7056 - 3508 =$

6. $3705 - 2426 =$

Depth Task

1. John earns £1485 a month as a bus driver and his wife earns £1760 as a teacher. If John gets a pay rise of £217 a month how much less than his wife does he earn?

2. This table shows the heights of three mountains.

Mountain	Height in metres
Mount Everest	8,848 m
Mount Kilimanjaro	5,895 m
Ben Nevis	1,344 m

How much higher is Mount Everest than the combined height of the other two mountains?

3. Faizaan plans to run 5000m over a few days. On Monday he runs 2860m and on Tuesday he runs another 750m. How many more metres does he have left to run?

1.

2.

3.

Greater Depth

Find the missing numbers that could go into the spaces.

Give your reasons for your answers.

$$\underline{\hspace{2cm}} - 1,345 = 4 _ 6$$

What is the greatest number that could go in the first space?

What is the smallest?

How many possible answers could you have?

What is the pattern between the numbers?

Here is a number line.

What number is B pointing to?

-1

1 mark

15

Courtney is using the column method to work out $3,999 + 5,999$

	3	9	9	9
+	5	9	9	9
	9	9	9	8
	1	1	1	

Explain a more efficient way that Courtney could have worked out the addition.

Courtney could have added 4,000 and 6,000 and then subtracted 2

Eggs are packed in boxes of 6 and boxes of 12

The table shows the number of eggs sold in a shop on a Saturday.

Size of box	Sales
Box of 6	12
Box of 12	10

On Sunday, the shop sells 150 fewer eggs than they did on Saturday.

They do not sell any boxes of 12 eggs.

How many boxes of 6 eggs are sold on Sunday?

Step one: work out how many sold on Saturday.

$$6 \times 12 = 72$$

$$12 \times 10 = 120$$

$$72 + 120 = 192$$

Step two: Work out how many less were sold on Sunday.

$$192 - 150 = 42$$

Step 3: work out how many boxes.

$$42 \div 6 = 7$$

Answers

Core skill

Write the following questions into your maths book.

1. $2437 + 4536 = 6973$

2. $1948 + 2351 = 4299$

3. $2948 + 5932 = 8880$

4. $4079 + 2143 = 6222$

5. $6728 + 1325 = 8053$

6. $5843 + 1472 = 7315$

Depth Task

1. A construction site uses 4671kg of cement on the foundations of some houses. If they use another 2,540kg for the foundations of another house. How many kilograms did they use altogether?

2. What is the sum of three thousand, four hundred and seventy six and four thousand, eight hundred and twenty five?

3. Faizaan runs 4650 metres before taking a break. He then runs another 2570metres. How many metres does he run altogether?

4. Umar is playing a computer game. The table shows the number of p her gets in each round.

Round	1	2	3
Number of points	3,550	2,175	1,895

a) How many points does Umar have at the end of Round 2?

b) He needs 8,000 by the end of Round 3 to win the game.

Does Umar win the game?

1. 7211

2. 8648

3. 7220 m

4.
a) $3550 + 2175 = 5725$

b) $5725 + 1895 = 7620$

Umar does not have enough points.

Greater Depth

Annie, Mo and Alex are working out the solution to the calculation $6,374 + 2,823$

Annie's strategy

$$6,000 + 2,000 = 8,000$$

$$300 + 800 = 1100$$

$$70 + 20 = 90$$

$$4 + 3 = 7$$

$$8,000 + 1100 + 90 + 7 = 8,207$$

Mo's strategy

	6	3	7	4
+	2	8	2	3
	8	1	9	7

Alex's strategy

	6	3	7	4
+	2	8	2	3
				7
			9	0
	1	1	0	0
	8	0	0	0
	9	1	9	7

Who is correct?

Annie

Annie is incorrect because she has miscalculated $300 + 800$. She has shown 11 **tens** instead of 11 **hundreds**.

Mo

Mo has forgotten to show and add the exchanged **thousand**.

	Th	H	T	O
	6	3	7	4
+	2	8	2	3
	9	1	9	7
	1			

Alex

Alex is correct with 9197.

Maths Answers - Friday

Task:

Core skill

Write the following questions into your maths book.

1. $4938 - 2354 = 2584$

2. $3295 - 1842 = 1453$

3. $3352 - 1826 = 1526$

4. $6297 - 2819 = 3478$

5. $7056 - 3508 = 3548$

6. $3705 - 2426 = 1279$

Depth Task

1. John earns £1485 a month as a bus driver and his wife earns £1760 as a teacher. If John gets a pay rise of £217 a month how much less than his wife does he earn?

2. This table shows the heights of three mountains.

Mountain	Height in metres
Mount Everest	8,848 m
Mount Kilimanjaro	5,895 m
Ben Nevis	1,344 m

How much higher is Mount Everest than the combined height of the other two mountains?

3. Faizaan plans to run 5000m over a few days. On Monday he runs 2860m and on Tuesday he runs another 750m. How many more metres does he have left to run?

$$\begin{array}{r} 1. \quad 1485 \\ + \quad 217 \\ \hline 1703 \end{array} \quad \begin{array}{r} 1760 \\ - 1703 \\ \hline 57 \end{array}$$

$$\begin{array}{r} 2. \quad 5848 \\ + \quad 1344 \\ \hline 7292 \end{array} \quad \begin{array}{r} 8848 \\ - 7292 \\ \hline 1556 \end{array}$$

$$\begin{array}{r} 3. \quad 2860 \\ + \quad 750 \\ \hline 3610 \end{array} \quad \begin{array}{r} 5000 \\ - 3610 \\ \hline 1390 \end{array}$$
